

You are invited to attend!

**The University of California's
Forest Science Team Fieldtrip**

Oakhurst

June 21, 2008

10am to 1pm

Meet at the turn off onto Sky Ranch Rd. (632), off Hwy 41
Located between Oakhurst and Cedar Valley

Here's a chance to join some of the UC science team members that have been collecting local forest inventory data for the **Sierra Nevada Adaptive Management Project (SNAMP)**.

This seven year forest study is looking at changes in forest structure as a result of tree thinning efforts by the Forest Service to minimize catastrophic fires. See what measurements are being taken and even learn how to take a few yourselves.

Bring your lunch and experience some hands on science with us.

RSVP: amlombardo@ucdavis.edu by June 10.

Thank you.

The SNAMP Public Participation Team
