

## Sierra Nevada Adaptive Management Project Water Research Integration Team Agenda

April 8th, 2011, 10:00 am to 2:00 pm

UC Cooperative Extension office , 2145 Wardrobe Way Merced, CA AND on-line at: <http://ucanr.org/snampwaterit2011> with the audio connection at: 1-866-740-1260, passcode 7548509

Meeting goals are to share the research design and findings from the UC SNAMP water research team thus far. The desired outcomes are to develop shared understanding about the water team's research, allow for mutual learning and build a foundation for adaptive management in respects to outcomes from the SNAMP forest treatments.

What (content)	How (process)	Who	Time (minutes)
<b><i>I. Welcome and overview</i></b> •Introductions •Background of SNAMP and the Integration Team	Presentation	Kim Rodrigues (facilitator)	10:00 -10:15 15 minutes
<b><i>II. Forest Service project implementation updates</i></b> •Update on USFS project status	Presentation	Dave Martin - Bass Lake RD; Chris Fischer - American River RD	10:15 –10:30 15 minutes
<b><i>III. Intro to the SNAMP Water Research</i></b> •Objectives/Goals/Overview •Study methods and sites •Observations & data	Presentation	Drs.Martha Conklin and Roger Bales	10:30 – 11:00 30 minutes
<b><i>IV. Detecting water-cycle changes</i></b> •Forest water balance – changes •Forest energy balance – changes •Modeling strategy & findings	Presentation / discussion	Roger Bales, Phil Saksa	11:00 – 12:00 60 minutes
<b>Lunch break (provided)</b>			<b>12:00 to 12:45</b>
<b><i>V: Discussion/ Question and Answer</i></b>	Discussion	Group	12:45- 1:30 45 minutes
<b><i>VI: Next Steps/ Wrap up/ Evaluation</i></b>	Discussion	Kim	1:30 – 2:00 30 minutes
<b>ADJOURN</b>			

*"The purpose of the SNAMP Integration Team is to engage the public, the University of California, and natural resource agencies in a process of mutual learning as we proceed through the adaptive management cycle. Part of the work is to learn about UC research and data, as well as USFS treatments, so that the IT can evaluate and understand the tradeoffs as research information is integrated within the adaptive management project and into Forest Service management. Ultimately, the goal is to address the part of the adaptive management cycle where scientific information and public input is integrated into future management decisions."*
