

## **DRAFT** Agenda

### **Meeting to Discuss Environmental Thresholds or "Triggers" to Support the UC SNAMP Project**

**Wednesday, January 24, 2007  
10:00-12:00**

**Powers Mansion Inn  
195 Harrison Avenue  
Auburn, CA**

#### **Goals for the Workshop**

1. Begin a discussion about the definition and uses for environmental thresholds or "triggers."
2. Establish a work group to produce a proposal for this subject to the MOUP and UCST.

#### **Introduction and Background**

- Review of Appendix E of the ROD
- Review of draft working paper on Thresholds (posted on website <http://snamp.cnr.berkeley.edu>)
- Goals for this session

*Purpose: Explain the foundation for this work and describe the preliminary thinking of the MOUP and UCST.*

*Desired Outcome: Shared understanding of the background information that prepares everyone for the more focused discussion.*

#### **Discussion of Focus Questions** (Kim Rodrigues, Facilitator)

- How should we define environment thresholds or "triggers"
- What role should they play in an adaptive management framework?
- What are steps to organizing a proposal for the MOU Partners and UC Science Team to address this topic?

*Purposes: To hear and discuss the participant's thoughts on this subject.*

*To identify a process for drafting a proposal for defining and using thresholds in the SNAMP project.*

*Desired Outcomes: Identify additional thoughts about the role for thresholds with SNAMP.*

*Formation of a work group to draft a proposal that defines "triggers" how they will be used for thresholds with the SNAMP project.*

*The identification of a timeline for completing a proposal to the MOUP/UCST.*
